Ahmed Al Maghribi Ignite Rose EDP: A Bold Woody Rose Fragrance

Ahmed Al Maghribi Ignite Rose EDP Perfume 100 ML offers a distinctive interpretation of rose through a darker and more structured fragrance profile. At **Fragsook**, Ignite Rose stands out for combining leather, aromatic geranium, woods, moss, musk, and vanilla. The composition moves away from a traditionally delicate rose style, creating a richer fragrance experience suited to modern perfume enthusiasts.

At **Fragsook**, the opening of **Ahmed Al Maghribi Ignite Rose EDP** begins with geranium and leather. Geranium introduces a green, aromatic freshness, while leather adds depth and a slightly rugged character from the first spray. This combination creates an intriguing opening that feels confident and sophisticated, making the fragrance particularly appealing to those who enjoy distinctive woody and leathery compositions.

The heart of **Ignite Rose EDP** develops around cedarwood and patchouli. At **Fragsook**, these notes bring earthy, woody depth while maintaining the fragrance's structured character. Cedarwood contributes a dry, polished quality, whereas patchouli adds richness and complexity. Together, they create a balanced middle section that connects the bold opening with the warmer and more textured base.

At **Fragsook**, the base of **Ahmed Al Maghribi Ignite Rose** delivers considerable depth through moss, musk, amber, sandalwood, sugarcane, white musk, oakmoss, wild woods, and vanilla. The combination creates a layered dry-down where earthy moss and woods meet creamy sandalwood, soft musk, and gentle sweetness. This makes Ignite Rose particularly suitable for evenings, formal occasions, and cooler weather.
